EDUCATION

Bachelor of Information Systems

Widyatama University

Graduated: 2014

LANGUAGES

- Indonesian — Native
- English — Professional Working Proficiency

CORE TECHNICAL SKILLS

FRONTEND TECHNOLOGIES

- Blazor
- React
- Next.js
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap

PROGRAMMING LANGUAGES

- C#
- JavaScript
- TypeScript
- Java
- Kotlin

FRONTEND DEVELOPMENT

- Responsive Web Design
- Reusable UI Components
- Component Libraries
- Design Systems
- REST API Integration
- Cross-Browser Compatibility
- UI Enhancement & Bug Fixing

MOBILE DEVELOPMENT

- Android (Java & Kotlin)
- Xamarin.Android

TOOLS

- Git
- GitHub
- Azure DevOps
- Docker
- Visual Studio
- Visual Studio Code
- Postman
- Playwright

PROFESSIONAL EXPERIENCE

UXBEE

Frontend Software Engineer

December 2024 – July 2026

Technologies: Blazor, Next.js, C#, Tailwind CSS, REST APIs, Azure DevOps

UXBEE is a Dutch software consultancy delivering enterprise solutions for clients across multiple industries. Worked on several client projects ranging from proposal management systems and Sitecore websites to reusable component libraries and survey platforms.

Key Contributions

- Developed enterprise web applications using Blazor and Next.js.
- Designed and maintained reusable UI components used across multiple applications.
- Built responsive user interfaces optimized for desktop, tablet, and mobile devices.
- Integrated frontend applications with REST APIs.
- Developed forms, dashboards, filters, tables, and business workflows.
- Improved existing features by implementing UI enhancements and resolving frontend defects.
- Contributed to a shared component library to improve consistency across projects.
- Participated in sprint planning, estimation, code reviews, and Agile Scrum ceremonies.
- Collaborated closely with backend developers, designers, QA engineers, and product owners.

Selected Projects

Certio

- Developed reusable design system components including buttons, drawers, dropdowns, tables, cards, and form controls.
- Built project management, questionnaire, and risk management (KRD) features.
- Implemented responsive layouts across desktop and mobile devices.
- Integrated frontend features with REST APIs.

Zakelijk Portaal

- Developed proposal management features using Blazor.
- Integrated business workflows with backend APIs.
- Built responsive pages and reusable components.

AO Migration

- Migrated and enhanced reusable frontend components.
- Worked with Sitecore Headless, Docker, and shared component libraries.

Van Wijnen

- Enhanced responsive Next.js components for a corporate website.
- Implemented UI improvements and component maintenance.

RAI

- Performed frontend maintenance and responsive validation.
- Planned Playwright automation framework for future UI testing.

COMSYS

Frontend Developer

March 2021 – November 2024

Technologies: Next.js, React, Tailwind CSS, REST APIs

Comsys is a Dutch software consultancy serving enterprise and government clients. Worked primarily on maintaining and enhancing an enterprise survey platform.

Key Contributions

- Maintained and enhanced enterprise frontend applications using Next.js.
- Built and improved reusable form components including radio groups, dropdowns, and text inputs.
- Implemented dynamic UI rendering based on API-driven configurations.
- Integrated frontend components with backend REST APIs.
- Fixed frontend defects and implemented client-requested enhancements.
- Collaborated within Agile Scrum teams alongside backend developers and QA engineers.
- Participated in sprint planning and daily stand-up meetings.

Selected Project

LiveCom

- Developed and maintained a dynamic questionnaire platform.
- Improved existing UI components and business workflows.
- Supported ongoing feature development and maintenance.

ACHIKO AG

Frontend Developer

2020 – January 2021

Technologies: React, JavaScript, HTML, CSS

Developed a responsive healthcare application during the COVID-19 pandemic to help hospitals and clinics monitor the availability of medical supplies.

Key Contributions

- Developed responsive user interfaces using React.
- Optimized layouts for phones, tablets, and desktop browsers.
- Built reusable frontend components for healthcare workflows.
- Collaborated with backend developers, QA engineers, DevOps engineers, and product owners.
- Delivered frontend enhancements within an Agile Scrum environment.
- Focused on providing a consistent user experience across multiple devices.

DSHORE

Mobile Developer

2019 – 2020

Technologies: Xamarin.Android, React Native, TypeScript, REST APIs

Worked on healthcare and manufacturing mobile applications for Dutch clients.

Key Contributions

- Developed Android tablet applications using Xamarin.Android.
- Consumed REST APIs to support real-time business workflows.
- Built mobile interfaces optimized for tablet devices.
- Collaborated with distributed international development teams.
- Worked in Agile Scrum environments with cross-functional teams.

Selected Projects

HealthPT

- Developed Android tablet features for a healthcare platform used by doctors and patients.
- Implemented appointment scheduling, medication management, and patient monitoring features.
- Integrated multiple REST APIs to retrieve patient data and medical information.
- Worked within a multi-platform team developing Android, iOS, phone, and tablet applications.

TimeTrack

- Sole mobile developer responsible for a React Native tablet application.
- Built workforce management features including task organization, shift schedules, and leave requests.
- Delivered cross-platform tablet interfaces for Android and iPad devices.

BRIDGE TECHNOLOGY

Android Developer

2018 – 2019

Technologies: Android Studio, Java

Worked onsite with the client to develop mobile fintech applications.

Key Contributions

- Developed Android features for a mobile investment platform.
- Collaborated closely with client stakeholders and cross-functional teams.
- Implemented frontend functionality using Android Studio and Java.
- Participated in Agile Scrum development processes.

Selected Project

Pluang

- Developed Android application features supporting digital gold investment.
- Built interfaces for buying, selling, and managing gold investments.
- Worked directly with the client's engineering team in Jakarta.

JASAMEDIKA

Android Developer

2017 – 2018

Technologies: Android Studio, Java

Developed Android applications for healthcare clients.

Key Contributions

- Implemented Android application features using Java.
- Collaborated with development teams to deliver healthcare-related applications.
- Participated in feature implementation and application maintenance.

PT CAKRA SYNTESIS

Android Developer

2015 – 2016

Technologies: Android Studio, Java

Began professional software engineering career developing Android applications for banking and commercial clients.

Key Contributions

- Developed Android applications for regional banking clients.
- Participated in the development of a social media application.
- Collaborated directly with clients to deliver mobile solutions.
